Notes
Main Rivers are designated by D2s on a Main River Map. The Environment Agency has permissive powers to carry out flood defence works, maintenance and operational activities for Main Rivers only, however, overall responsibility for maintenance lies with the operator/sewer.

The Environment Agency Flood Map for Planning (Rivers and Sea) is available on the Environment Agency website (www.gov.uk/environment-agency) and displays the risk of flooding based on probability.
- Flood Zone 1: Land assessed, ignoring the presence of flood defences, as having a less than 2% annual probability of flood flooding or between a 1/100 and 0.1% annual probability of surface or fluvial flooding.
- Flood Zone 2: Land assessed, ignoring the presence of flood defences, as having between a 1/100 and 0.1% annual probability of flood flooding or between 0.5% and 0.1% annual probability of total flooding in any year.
- Flood Zone 3: Land assessed, ignoring the presence of flood defences, as having a 1% or greater annual probability of fluvial flooding or a 0.5% or greater annual probability of total flooding in any year.

Main Rivers are designated by Delha a 'Main River Map'. The Environment Agency has permission to carry out flood defence works, maintenance and operational activities for Main Rivers only.

However, overall responsibility for maintenance lies with the taxpayer owner.

The Environment Agency Flood Map for Planning (Rivers and Sea) is available on the Environment Agency website (www.gov.uk/environment-agency) and displays the risk of flooding based on probability:

- Flood Zone 1: Land assessed, ignoring the presence of flood defence, as having a 0.5% annual probability of fluvial or tidal flooding.
- Flood Zone 2: Land assessed, ignoring the presence of flood defence, as having a 1% and 2% annual probability of fluvial or tidal flooding or between 0.5% and 0.7% annual probability of fluvial flooding in any year.
- Flood Zone 3: Land assessed, ignoring the presence of flood defence, as having a 1% or greater annual probability of fluvial flooding or a 0.5% or greater annual probability of tidal flooding in any year.
